

# Make returning to work safer

## Cigna Return-to-Work Worksite Program

### Cigna Return-to-Work solutions are designed to help employers create a safer, healthier worksite during the COVID-19 pandemic.

Cigna is here to support your organization with the tools and resources you need to create a safer environment and bring employees back to work quickly.

**91% of Americans age 25 and older** say they would be “*very comfortable*” or “*somewhat comfortable*” submitting to a temperature check at their workplace.<sup>1</sup>

Let's return to work, together.

## Basic Temperature Screening Program

### Initial Temperature Screening Package

- › Free-standing, thermal imaging scanner to perform temperature checks.
- › Setup materials from manufacturer, includes how-to video with instructions and technical e-consult support to aid in set-up.
- › Marketing support for you and your employees:
  - › Signage for temperature check stations
  - › “What to do next” take-home sheet for employees
  - › Turnkey employee engagement communications

### Optional: Employee Care Kit

- › Oral thermometer, facemask, hand sanitizer and pulse oximeter

## Enhanced Temperature Screening Program

### Initial Temperature Screening Package + 2nd Level Temperature Screening with Onsite Health Coach-Led Triage

- › Free-standing, thermal imaging scanner to perform temperature checks.
- › Onsite Health Coach Triage Nurse performs secondary temperature check. If elevated temperature is confirmed, the Health Coach Triage Nurse:
  - › Guides the employee home and directs to local health care provider and community resources for further evaluation/assistance
  - › Follows up with employee telephonically to holistically evaluate physical, mental and social determinants of well-being
  - › Provides further referral resources as indicated
- › Health Coach Triage Nurse supplied with all necessary equipment and PPE.

### Enhanced Plus: Diagnostic Test Screening with Virtual Provider

- › Onsite Registered Nurse performs swab sample collection to test for COVID-19 via reference lab, under standing orders (where available).
- › RN and/or physician follows up with employee to discuss results and next steps.

Together, all the way.®

1. Civic Science, "Most Americans Would be Willing to Submit to Temperature Checks," April 9, 2020, <https://civicscience.com/most-americans-would-be-willing-to-submit-to-temperature-checks/>

Temperature checking is one tool to assist with COVID-19 prevention, but is not a test for infection. Individuals infected with COVID-19 may be asymptomatic and not present with an elevated temperature.
